SUBJECT: Scott Model 631 Series Chemical Canisters and Model 631 P100 Filters

Scott Health and Safety found through repeated testing that some Model 631 Chemical Canisters with P100 filters and Model 631 P100 filters may not protect users from particulate or oil containing particulates aerosols as required by NIOSH certification.

Please read the attached Important Safety Notice for identification of the Model 631 Chemical Canisters with P100 filters and Model 631 P100 filters. Once you have read and understand the information contained in the notice, please forward a copy of this Important Safety Notice to your customers who have purchased Model 631 Series Canisters and filters during the time frame identified in the notice. Additional copies of this notice and User Response Form are available from Silverstone Printing and Graphics.

Owners of these products are asked to inspect all Model 631 Series Canisters and filters in their possession that may be held in inventory or presently distributed for use, complete the User Response Form attached to the notice, and immediately return the form to Scott Health and Safety. Upon receipt at Scott of the completed User Response Form, replacement Model 631 Series Canisters and/or filters will be shipped immediately to the owners of these products. The replacement canisters can be identified with the "orange dot" as described in the attached notice. Scott will then also make arrangements to have the original canisters and/or filters returned to Scott for disposal.

Scott Health and Safety recognizes the important role its products play in the safety of the people that use these products and is committed to ensure the safety and satisfaction of these individuals. Should you have any questions, please feel free to contact your Scott Regional Manager, Field Service Specialist, or Tech Support team member.

Cordially,

A handwritten signature in black ink, appearing to read "Rick Hofmeister".
